Batteries needed to power the product?	Yes

Key messages & benefits

- Control your heating from your smartphone, tablet or laptop
- New-look Hive Thermostat with touch buttons – a fresh take on the classic design
- No need to switch energy supplier
- Works with your existing boiler
- Save up to £110 a year on your heating bills

Your Hive kit

- **Wireless Thermostat** – lets you control your heating when you're at home.
- **Hub** – plugs into your broadband router so you can control your thermostat remotely.
- **Receiver** – enables your thermostat and hub to communicate with your boiler.

Extra info

- New-look Hive Thermostat is not compatible with the interchangeable coloured frames
- Hive Thermostat for Heating must be installed by a qualified professional
- Hive Thermostat for Heating is suitable for homes that have a combi boiler. If you do not have a conventional boiler with a separate hot water tank, then Hive Thermostat for Heating and Hot Water is the right product for you.

What you'll need to get Hive

- A working central heating system, Hive can be installed on gas or LPG systems (and certain electric boilers).
- An existing broadband connection with a spare Ethernet port connection.
- An extra power socket close to your broadband router.
- For the Hive app, you'll need an Apple iPhone or iPad (iOS 9 or higher) or a device running Android (min 4.4).
- Laptop or tablet with internet access and an up-to-date web browser (we recommend minimum: Microsoft Edge or the latest versions of Google Chrome, Firefox and Safari).
- Hive is a British Gas innovation, but you don't need to be a British Gas customer to buy the Hive products.
